1. Identification

Product name **AgaPure™ Agarose LE (Standard Agarose)**
500g

Cat. No **AG006**

2. Description

Agarose is a neutral polysaccharide which is obtained in many purification steps from the cell wall of certain algae and red algae. Standard Agarose forms very clear gels with all standard running buffers and will result in a sharp and clear separation of your bio molecules. Extremely pure agarose with very low interference binding to staining reagents which produces a low background and high contrast appearance after staining.
