

# DATA SHEET

Version: 3  
Revision date: 06/03/23

## 1. Identification

<b>Product name</b>	<b>Lambda DNA/HindIII Marker</b>
	50 µg
<b>Cat. No</b>	L0020

## 2. Description

The Lambda DNA/HindIII marker is ready to use and can be visualized on agarose gel. It is composed by 8 fragments ranging from 125 to 23.13 kilobases in size: 125, 564, 2027, 2322, 4361, 6557, 9416, 23130 bp. The resulting steps are shown in the figure.

## 3. Specifications

**Concentration:** 0,1 µg/µL**Storage:** Stable at room temperature for 3 months. For long term storage, store at -20 °C (2 years).

## 4. Recommended Loading

The recommended amount of size marker to load on a gel is 0.5 µg per lane.

## 5. Further information

<b>Product Use Limitations</b>	This product is developed, designed and sold exclusively only for research purposes use. The product was not tested for use in diagnostics or for drug development, nor is it suitable for administration to humans or animals.
<b>Safety Information</b>	When working with chemicals, always wear a suitable lab coat, disposable gloves, and protective goggles. For more information, please consult the appropriate material safety data sheets (MSDS). These are available online in convenient and compact PDF format at <a href="http://www.canvaxbio.com">www.canvaxbio.com</a> where you can find, view, and print the MSDS for each CANVAX kit.
<b>Disclaimer</b>	The information provided in this Data Sheet is correct to the best of our knowledge and belief at the date of publication. This information is intended only as a guide and should not be taken as a warranty or quality specification. Canvax Reagents S.L.U. shall not be held liable for any damage resulting from handling or from contact with the above product.
